

Acid Chlorides & Chloroformates

What are **Acid Chlorides & Chloroformates (ACCF)**?

ACCFs serve as essential building blocks across many value chains and are used in the manufacture of pharmaceuticals, polymers, agrochemicals (crop protection products), and personal care ingredients.

Why BASF ACCFs?

BASF offers approximately 25 products across the chloroformates, acid chlorides, and alkyl chlorides portfolio. With major production sites in **Germany** and **South Korea**, recent capacity enhancements have enabled the introduction of new products. BASF also leverages innovations such as double-layer composite drums to ensure safe packaging and transport of these critical intermediates.
