

# Vinyl methyl oxazolidinone (VMOX)

**VMOX** is the new commercially available vinyl monomer for UV curing products in the printing and coatings industry, especially for digital UV printing. With VMOX, BASF is expanding the industry's most comprehensive portfolio of functional vinyl monomers.

## Technical benefits

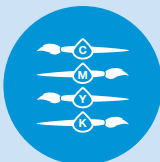

Favorable  
toxicological  
profile

Liquid with  
very low  
viscosity

High color  
response

High  
reactivity

Good  
adhesion

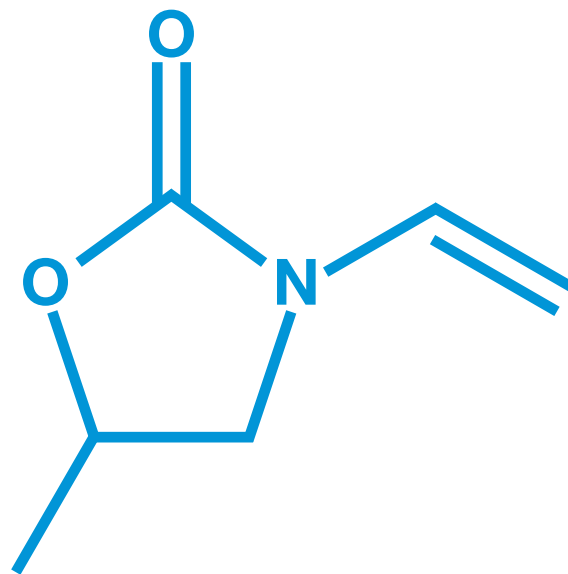

Low  
odor

**BASF**

We create chemistry
