

Koresin® –

The tackifier for the rubber industry

Now available in two variants for advanced sustainability

... using the
ChemCycling®
approach

Koresin Cycled®

- Using recycled feedstock derived from plastic waste
- 100% substitution of fossil with sustainably certified recycled raw materials in the value chain
- Contribution to saving of finite fossil resources
- Drop-in solution: identical quality and properties compared to standard Koresin
- Manufactured in a certified mass balance approach

... using the
Biomass Balance
approach

Koresin BMBcert™

- Using renewable feedstock
- 100% substitution of fossil with renewable raw materials in the value chain
- Contribution to saving CO₂ emissions
- Drop-in solution: identical quality and properties compared to standard Koresin
- Manufactured in a certified mass balance approach
