

CERTIFICATE

Recyclability of a Packaging Material Group

BASF SE

Carl-Bosch-Strasse 38

D-67056 Ludwigshafen am Rhein, Germany

The company receives the certification of recyclability for the following packaging materials.

Designation

**LDPE-based multilayer packaging films with Polyamide 6 (PA6)
including $\leq 30\%$ by weight of PA6;**

in coextruded polyethylene films, based on LDPE and/or LLDPE; packaging size $\geq A5$;
with ≥ 0.5 g per g PA of maleic anhydride-grafted PE as tie layer specified for PA/PE;
not including printing inks, adhesives or other components that can affect the recyclability

Test result

Assessment via path/specification: Path 1: Plastic films / LDPE

Recyclate (final product): LDPE Regranulate

Test standard / scope of application:

- Requirements and assessment catalogue of the institute cyclos-HTP for EU-wide certification (state 07.10.2019) /
Scope of validity according to nation states, see chapter 1
 - DIN EN 13430 with regard to material recyclability in the post-use phase; also integrated
- The following reference processes, materials and applications are taken into consideration within the certification process:
- Detection as flexible PE packaging in state-of-the-art sorting plants
 - Recyclate use for injection moulding and blown film applications
 - Test program based on CHI test method CHI-C8-PEF-1/2.0 with the use of PCR-based LDPE recyclate as reference

According to the CHI standard the recyclability of the packaging component amounts to:

$\geq 70\%$ (AT, DE, ES, FR, IT, NL, NO)

This certificate (No. 2187-2021-002125) is valid until the **31.05.2022** (1 year upon issue) relating to the countries identified in the assessment report. This certificate will lose validity in case of qualitative or quantitative changes of packaging components.
